

List of questions

to Intermediate control №2" Practical skills ENT examination"

4 th course General medicine faculty

1. Methods of investigation of the nose, paranasal sinuses and pharynx
2. Methods of investigation of the larynx in adults and in children
3. Methods of investigation of the external and middle ear
4. Methods of investigation of the auditory tube
5. Tuning fork examination, hearing passport, Rinne, Weber and Schwabach tests and its clinical value
6. Federichi, Bing and Gelle tests and its clinical value
7. Pure tone audiometry
8. Differential diagnosis between conductive and sensorineural hearing loss
9. Otoacoustic emission, auditory evoked potentials in adults and in children
10. Tympanometry and its clinical value in different types of hearing loss
11. Speech audiometry, suprathreshold audiometry
12. Methods of investigation of the vestibular system
13. Differential diagnosis between cerebellar abscess and labyrinthitis
14. Rotation test
15. Caloric test, fistula test
16. Otolithic test

Practical skills

1. External examination, palpation of the nose and paranasal sinuses
2. Anterior rhinoscopy
3. Local anesthesia of the nasal cavity
4. Reading of the x-ray (paranasal sinuses, nasal bones)
5. Olfaction test
6. Anterior and posterior nasal packing
7. Oropharyngoscopy
8. Posterior rhinoscopy
9. Local anesthesia of the oral cavity
10. External examination, palpation of the neck and pharynx
11. Indirect laryngoscopy
12. Reading of the x-ray (larynx)
13. External examination, palpation of the ear
14. Otoscopy
15. Cleaning of the external auditory meatus

16. Washing of the ear
17. Putting the ear drops
18. Blowing of the auditory tube
19. Acoumetry and tuning fork examination
20. Reading of the X-ray (temporal bone)
21. Reading of the audiogrammes
22. Vestibulometry

Head of the department of surgical stomatology
and maxillo-facial surgery with a course of ENT diseases
PhD in Medical sciences, assoc. prof.

L.B. Filimonova
